Resume

Jerald G. Huff III
Winter Springs, FL 32708

OBJECTIVE: Seeking a position as a PHP Developer with a great organization, where I am able to utilize my superior programming, problem solving and technical computer skills.

HIGHLIGHTS AND QUALIFICATIONS:

- I have extensive knowledge and experience of designing complex web applications that utilize multiple language platforms to include PHP, SQL, MySQL, HTML, CSS, Visual Basic and Javascript.
- I specialize in content management systems that are designed to track specific data from the end user all the way up to secure administration of the system.
- Am a focused individual who emphasizes on attention to detail and meeting deadlines for specific projects.
- I enjoy solving computer-related problems and issues and I am able to design, implement and create programs that revolve around solutions to problems.
- My goal is to represent the company the best way possible by providing professional services, sharing my technical knowledge and ultimately, establishing good relationships with people I meet on a daily basis.
- I enjoy math, and use it everyday in my programs. I graduated high school after taking collage level Calculus II.

PROGRAMMING SKILLS:

- Designed and created custom website platforms designed to meet specific needs, to include web development, database creation and management and much more.
- I am able to create and implement security measures to the site to minimize security threats from hackers that have the intent of stealing the identity of others and obtaining secure information stored in the database.
- Use of Object Oriented Programming in languages like PHP, Java, and Visual Basic.
- Create complex array and loop structures using dynamic variables, dynamic arrays, dynamic nested arrays, for each, for, do, do while loops, as well as switch statements.

PROBLEM SOLVING:

- Have developed systems designed to make work flow more efficient by setting up CRON jobs to provide custom, detailed reports.
- Have utilized my computer-repair skills to help people get their current systems working efficiently and smoothly.
- Have personally developed and offered security programs to people to help them stay protected from viruses and other potential security threats, while browsing the internet and being connected to a specific network.

SPECIAL SKILLS:

- Highly skilled with computers, ranging from set up, programming, development of web sites and many other aspects pertaining to IT work.
- Experienced with set up, repair and maintenance of computer hardware, servers, networks and more.
